

Rob Edwards

Apprentice Maintenance Electrician

As I began my training at college they offered me several interviews to attend, one of these being Nylacast. After I had the interview I was delighted to join the team at Nylacast as an Apprentice Maintenance Electrician. When I began working for Nylacast I was treated with great respect and was able to fit in quickly with people around me.

I am based at Hastings road where I work as part of the maintenance team, with two fully skilled maintenance engineers. We are responsible for two of the four sites we have here. I still attend college one day a week and work at Nylacast for the other four. I am in my last year of my advanced apprenticeship and if I do choose to go further with my education I'm sure Nylacast will have no hesitation in supporting me as they have done so far within my time here. I hope to have a long successful career with Nylacast, achieving the best for the company and myself.

Incorporating: Nylacast UK  Nylacast SA  Nylacast LLC USA
